How to use it

Turn On:

Slightly press power button, the audio will be turned on after a “Didi” sound. Attention: if the audio has already matched a cell phone or other Bluetooth device, it will automatically match again when it’s turned on. Please turn on your Bluetooth device, the audio and your device will automatically match.

Turn Off (or Standby):

Audio off, slightly press power button, your audio will be turned off.

To Answer the Phone:

Short press the power button to answer the phone; The music will stop for answering the phone; The music will continue after the phone call is completed.

Device Match:

You can use your audio only if it’s matched with your phone’s Bluetooth. The procedure that your Bluetooth devices can remember each other’s ID during the automatic match (cell phone or tablet PC). It’s one time match for same device.

- Step I. Make sure the audio is fully charged before matching.
- Step II. Slightly press the power button, the audio is ready for match after a “Didi” sound.
- Step III. Turn on Bluetooth in your cell phone or tablet PC, find the audio Bluetooth device (please refer to your cell phone introduction of how to find Bluetooth).
- Step IV. Choose the audio device ID: DL-M8, blue light flashing means matching, blue light on means matched for playing music and answering phone.
- Step V. When the music on, short or long press the power button to pause or stop it. Music will stop for answering phone if phone call coming, short or long press is to answer or refuse phone call. Short press to hang up, music continues after phone call.

Notice:

It’s one time match for same device. Wireless Bluetooth Audio will automatically stop when Bluetooth is disconnected. Some cell phones may require match before connection. Please refer to your device’s instructions.
